Youngchan Kim

Ph.D. student @ MPI for Informatics

kyc9618@gmail.com | *https://youngchan-k.github.io*

Education

Max Planck Institute for Informatics / Saarland University — *Apr 2026 – Present*
Ph.D. in Computer Science — *Saarbrücken, Germany*

POSTECH — *Mar 2022 – Feb 2024*
M.S. in Artificial Intelligence — *Pohang, South Korea*

Yonsei University — *Mar 2016 – Feb 2022*
B.S. in Mathematics & Electrical and Electronic Engineering — *Seoul, South Korea*

Research Experience

Visual Computing and AI Department, MPI for Informatics — *Apr 2026 – Present*
Doctoral Researcher — *Saarbrücken, Germany*

- Advisor: Prof. Christian Theobalt
- (1) Physically-grounded Visual Generative Models / (2) Relightable Human Avatars

Computer Graphics Lab, POSTECH — *Mar 2022 – Feb 2024*
Master's student — *Pohang, South Korea*

- Advisor: Prof. Seung-Hwan Baek
- (1) High-dimensional Light Properties / (2) Light-Matter Interaction Modeling

Publications

* Multi-Dimensional Light Properties *

[1] **Hyperspectral Polarimetric BRDFs of Real-world Materials**
Yunseong Moon, Ryota Maeda, Suhyun Shin, Inseung Hwang, **Youngchan Kim**, Min H. Kim, Seung-Hwan Baek
SIGGRAPH Asia 2025

[2] **Spectral and Polarization Vision: Spectro-polarimetric Real-world Dataset**
Yujin Jeon*, Eunsue Choi*, **Youngchan Kim**, Yunseong Moon, Khalid Omer, Felix Heide, Seung-Hwan Baek
CVPR 2024 (highlight)

[3] **Neural Spectro-polarimetric Fields**
Youngchan Kim, Wonjoon Jin, Sunghyun Cho, Seung-Hwan Baek
SIGGRAPH Asia 2023

Work Experience

NationA *Aug 2025 – Nov 2025*
AI/ML Engineer *Seoul, South Korea*

- Reproduced AI motion generation algorithms for realistic and coherent character animation
- Deployed motion synthesis and editing models via APIs for web-based 3D content creation

Beeble *Apr 2024 – May 2025*
AI Researcher *Seoul, South Korea*

- Developed human-centric vision models for PBR map extraction and monocular depth estimation
- Built a virtual light stage in Blender for multi-view 3D human rendering with controllable lighting
- Optimized AI models to extract pixel-accurate VFX passes (albedo, normal, depth, etc.) from video

Teaching Experience

Lecturer

- Data Analyst Bootcamp 12th - CODEIT *Feb 2026 – Apr 2026*
- Vibe Coding with Antigravity - ELICE *Dec 2025*
- AI Integration for Digital Transformation in Practice - KOSME *Nov 2025*
- Python and Data Analytics for Digital Transformation - SAMSUNG ELECTRONICS *Apr 2024*

Teaching Assistant

- AI Engineer Bootcamp 9th - CODEIT *Dec 2025 – Apr 2026*
- Deep Learning and Computer Vision - POSCO GROUP *Oct 2022 / Jul 2023*
- CSED700G TinCS: Computational Imaging - POSTECH *Spring 2023*

Skills

LANGUAGES Korean (Native - 5/5), English (Conversational - 3~4/5)

PROGRAMMING & SW Python, PyTorch, TensorFlow, OpenCV, NumPy, Matplotlib, C/C++, Linux, Docker

GRAPHICS & RENDERING Blender, Google Filament, Three.js, Mitsuba 2/3

Reference

Prof. Christian Theobalt
Ph.D. advisor

- Director, Visual Computing and AI Department, MPI for Informatics
- Professor, Department of Computer Science, Saarland University
- Director, Saarbrücken Center for Visual Computing, Interaction and Artificial Intelligence
- *theobalt@mpi-inf.mpg.de* | *https://people.mpi-inf.mpg.de/~theobalt*

Last updated on March 25, 2026

Dr. Rishabh Dabral

Ph.D. advisor

- Research Group Leader, 3D Visual Intelligence Research Group, MPI for Informatics
- *rdabral@mpi-inf.mpg.de* | *https://rishabhdabral.github.io*

Prof. Seung-Hwan Baek

M.S. advisor

- Associate Professor, Department of Computer Science and Engineering, POSTECH
- Affiliated Professor, Graduate School of Artificial Intelligence, POSTECH
- *shwbaek@postech.ac.kr* | *https://www.shbaek.com*
